

SONG LYRICS

Journey of Fresh Water

(M.Beckwith/M.Heatherton) ©2011 Building Block Entertainment Inc.

This seashore makes me thirsty
Ironic, don't you think?
Ocean water everywhere
But not a drop to drink
Where does fresh water come from?

High in the mountains
Peaks covered with snow
Water is frozen
'Cause temperature's low
Winter turns to spring
And sun's warmth is felt
Then snow becomes slushy
As it starts to melt
From solid to liquid
It's starting to flow
Down from the mountain
It's on the go
Joining more water
From other snow peaks
It moves a bit faster
Forming white water creeks

(CHORUS)

Down the mountains into rivers and lakes
What a great journey fresh water makes
I want to know
Where's it go... then?

In a fast moving river
It's traveled far
Round turns, down falls
To a reservoir
Through aqueduct rivers
That people have made
Across California
Goes the water cascade

(repeat CHORUS)

Into long skinny pipes
That lie underground
To all of the houses
Here in our town
It came from the mountains
All the way to our sink
So value every sip
Every drop that you drink

(repeat CHORUS)

So it came along way
Your story told me how
But when it circles down the drain
Where's that water go now?
That's another story

From the album
"The Amazing Journey of Water"
