

SONG LYRICS

Storm Drain

(M.Beckwith) ©2011 Building Block Entertainment Inc.

Rain is falling on the highway
Rinsing car oil down my driveway
Oil is mixing with the rain
So oil is running down the storm drain

Beg your pardon
What's a storm drain?
Right there by your feet
It's a whole in the street

Storm drain's connected to a big pipe
Big pipe connected to a bigger pipe
Polluted fluid's flowing in motion
And it's all going into the ocean

Down the river to the ocean
Down the river to the ocean

Rain is falling on the front lawn
The lawn I put the fertilizer on
So those chemicals are mixing with the rain
And it's all going down the storm drain

Tell me again
What 's a storm drain?
Right there by your feet
It's a whole in the street

Storm drain's connected to a big pipe
Big pipe connected to a bigger pipe
Polluted fluid's flowing in motion
And it's all going into the ocean

Down the river to the ocean
Down the river to the ocean

Pesticides, fertilizer,
chemicals, car oil,
plastic cups, cigarette butts,
Even doggie doo...ooo

They're sending urban waste
To the wrong place

So now you have a good notion
Of what might go to the ocean
Rain puts chemicals in motion
Down the river to the ocean
Down the river to the ocean
Down the river to the ocean

From the album
"The Amazing Journey of Water"
