

SONG LYRICS

Waterology

(M.Beckwith) ©2011 Building Block Entertainment Inc.

So you may know
About H₂O
Two hydrogen
One oxygen

That molecule
You learned in school
But have you heard
This crazy word?

Waterology, Waterology
It's like Ecology
Waterology
Not in the dictionary
Not a word, but ought to be
That's Waterology

From a rainbow glow
To a flake of snow
It's behind the dam
A habitat for clam

Canyons erode
Geysers explode
Science deserves
A wacky water word

That's Waterology, Waterology
What else could it be?
If not Waterology
Maybe hydrology
But water sounds much better to me
It's Waterology

Did you ever think
The most important drink
Helps plants survive
Keeps us alive?

From sky to ground
It gets around
If I could earn a degree
I'd get a Ph. D

In Waterology, Waterology
Come and learn with me
Waterology
I agree its kinda silly
But you will remember, really!
I say Waterology
Hey, I'll get a college degree
Get an "A" in Waterology

From the album
"The Amazing Journey of Water"
